Changing the Filter and Slit Tables for OSMOS

In the Prospero Command Window:

- *tedit* <name> where <name> is *filter1* or *filter2* or *slit*.

- Enter the ID number corresponding to the slot that needs to be modified. Note that '6' should be left "Open"

- Enter new name, such as *1.2 Cent*, or *U*. Note that you should not use the symbol " to denote arc seconds.

- Type *-2* to quit editing and save.

- Simply hit the <Enter> key to continue through the remaining three queries.

- Type *print* <name> where name is the edited table to verify changes.

- Type *startup* to load the new table so that it correctly displays in the Prospero Status window.
